*Acknowledgment*

THIS DISPLAY of the work of Mr. Fritz Kredel and Mr. Hermann Zapf, the third to be held in the Museum in recent years in which the graphic arts have figured, reflects at once a growing public interest in the design of books and an increased emphasis placed upon book design in the art training of today. The present exhibition, modest in scope, has been arranged at the request of The Cooper Union Art School; and the Museum is indeed grateful to Mr. Kredel and Mr. Zapf for their generosity in making available the examples of their work here shown. To Huxley House, which at its own expense has printed announcements and this catalogue, and to Mr. Paul Standard, to whose efforts the exhibition is due, are given appreciative thanks.

## *A Note Upon the Joint Exhibition of Work of Fritz Kredel & Hermann Zapf*

FOR A THOUSAND YEARS before Gutenberg, illuminated manuscripts carried in their pages the seeds of many a later art. The illuminations themselves have long been esteemed as an inspired source of Western painting; their accompanying text-hands gave the impetus to the evolution of European scripts, and hence to the development of the type forms the new craft of printing was to require; and the rubrications and lesser decorations in manuscripts were destined to bring printer's flowers and illustrative woodblocks to the service of the printed book.

The Cooper Union Museum for the Arts of Decoration, to mark the spirited survival of these related arts, has chosen for display the work of two noted practitioners: Fritz Kredel of New York, and Hermann Zapf of Frankfurt who is now visiting too briefly the land of Frederic W. Goudy, Bruce Rogers, T. M. Cleland, W. A. Dwiggins and the late D. B. Updike.

Kredel's fame as associate of the late Rudolf Koch at the latter's Offenbacher Werkstatt had preceded him to the land of his recent adoption, where he has won wide recognition for his vigorous woodcuts, for his rugged

book illustrations and for his incisive 'calligraphic' drawings. The show includes some of his earlier work from the days of his collaboration with Rudolf Koch, notably the three-volume *Blumenbuch*, which remains the finest woodcut flower-book of our century. Another landmark in book illustration is his series of woodcuts for a marionette version of *Dr. Faustus*, its archaic text derived from Marlowe's contemporary Elizabethan play and privately published last year. Kredel's newer 'calligraphic' drawing style is represented by his recent *Candide*, done here for the Peter Pauper Press. Alike in black-and-white and in color, Kredel's woodcuts and drawings echo his personal traits: humor, vitality, gravity and scholarship. His lifelong studies of ancient armor and military uniforms brought him a major commission—to do the illustrations for Frederick P. Todd's *Soldiers of the American Army, 1775-1941*. Their stalwart and alert vigor and their authentic colors won from the *New York Sun* in 1941 a seven-column review of this splendid book—a recognition rarely equalled in American journalism.

Rated at 32 among post-war Germany's impressive

talents, Zapf started as a retoucher in an engraving plant at Nuernberg. But his passion for letter forms enabled him in the ensuing fifteen years to complete some fifty manuscript projects of various lengths and in various scripts. Of these manuscripts a round dozen appear in the present exhibition, including the gem-like version of Goethe's *Der westoestliche Divan*, which is in fact his latest scribal work. Also in the show is his now famous *Feder und Stichel*, a book of twenty-five of his calligraphic plates cut in lead by August Rosenberger and printed on Fabriano paper, its five text pages set in the author's new Palatino roman type. Of this volume, so stern a critic as Jan Tschichold declared to the undersigned that no book in the last hundred years shows a comparable perfection of printing. Zapf's more recent type designs are shown in progressive stages, from orig-

inal sketches through working drawings to finished proofs.

Because of unforeseeable travel complications, the present joint exhibition could be arranged only through exceptional and devoted emergency work by the principals involved, and by other bibliophiles and calligraphiles. Finally, it should be recorded that Messrs. Walter Huxley and Franz Hess of Huxley House, admirers of the work herein described, have of their own motion contributed all the printing occasioned by the present show, the display type used being the new Trajanus face designed by Warren Chappell, the only native American pupil of the late Rudolf Koch.

Wenn Sie wüßten,  
wie roh selbst gebildete Menschen  
sich gegen die schätzbarsten Kunstwerke verhalten,  
Sie würden mir verzeihen, wenn ich die meinigen  
nicht unter die Menge bringen mag.

Niemand weiß eine Medaille am Rand anzufassen;  
sie betasten das schönste Gefüge, den reinsten Grund,  
lassen die köstlichsten Stücke zwischen Daumen und  
Zeigefinger hin und her gehen, als wenn man Kunst-  
formen auf diese Weise prüfte. Ohne daran zu denken,  
daß man ein großes Blatt mit zwei Händen anfassen  
müßte, greifen sie mit einer Hand nach einem  
unschätzbaren Kupferstück, einer unersetzlichen Zeichnung,  
wie ein anmaßender Politiker eine Zeitung faßt,  
und durch Zerknütern des Papiers schon im voraus  
sein Urtheil über die Weltbegebenheiten zu erkennen  
gibt. Niemand denkt daran, daß wenn nur zwanzig  
Menschen mit einem Kunstwerke hintereinander  
ebenso verfahren, der einundzwanzigste nicht mehr  
viel daran zu sehen hätte.
